Ranked as one of the „Leading Construction Lawyers in Germany“
Euromoney Expert Guides since 2015

Recommended as „highly committed“
Legal500 Handbuch 2014

Since 2012 Thomas Günther has been partner at the Frankfurt office of the law firm of AGS Legal. Prior to joining AGS Legal Thomas worked from 2004 (admission to the bar) until 2012 for the international law firm of Hogan Lovells LLP in Frankfurt as a member of the practice group Projects, Engineering and Construction. He focuses on the practice areas of construction and real estate law. Thomas Günther especially assists investors, principals and contractors with implementing

and executing project developments, building projects, plant construction projects as well as asset management. He also assists his national and international clients with the negotiation and drafting of contracts and represents them in disputes concerning the enforcement and or defending of claims in court and arbitration proceedings. In addition, he advises clients from the manufacturing industry and the hotel industry on issues such as contract law and liability law.

Projects (Selection):

- Real Estate Fund: representation in legal disputes following the acquisition of several shopping centers and in the area of asset management
- Infrastructure-Provider: representation in arbitration proceedings regarding a pipeline project
- US engineering company: legal advise during the contractual negotiations for the construction of an offshore platform
- German Bank: providing advice regarding several project developments
- IT service provider: providing advice regarding the contract negotiations and the execution of the works in several data center projects
- Leading hotel group: providing frequent advice regarding the negotiation and execution of hotel management and leasehold agreements
- International Investor: providing advice regarding several refurbishment projects
- Project Developer: providing advice regarding the acquisition, lease and refurbishment of a commercial real estate to be used as manufacturing site
